CryptoPeseta

Vision

The CryptoPeseta project began in March 2021 and became a reality on February 28th, 2022 with the intention of accelerating the adoption of cryptocurrency and using it as a mechanism to facilitate the creation of new forms of human and social interaction, using Binance Blockchain technology.

Since the creation of Bitcoin, a remarkable number of tools and possibilities have been created to develop a more transparent, dynamic, evolved and decentralized society.

Mission

The mission of CryptoPeseta is to allow money transfers to anywhere in the world in just seconds. It is a token that is based on the technology, and the security offered by the Binance Blockchain, therefore, it provides strong security in its transactions, being totally anonymous.

The name, CryptoPeseta, is a tribute to the Spanish old national currency, the Peseta. It was withdrawn from circulation on February 28th, 2002.

The release of this token begins on February 28th, 2022, coinciding with the 20th anniversary of the disappearance of the Peseta.

In this way we try to prevent the old Peseta from falling into oblivion and to bring to society a new economic model of international market with the new CryptoPeseta.

CryptoPeseta economy and utility

CryptoPeseta tokens are intended to become valuable assets, granting their holders a wide range of rewards linked to activity in the cryptocurrency ecosystem. Holders of CryptoPeseta tokens can exchange assets using these tokens.

CryptoPeseta security and technology

The project is developed under the BNB-20 protocol, a protocol created to work on the Binance network Blockchain through a smart contract that allows the exchange of CryptoPeseta tokens.

Transactions made in Cryptopesetas will be included in the Binance blockchain. Given the wide distribution of this blockchain, the integrity and inviolability of these transactions is guaranteed.

The security of the Binance network, as with Bitcoin, is intrinsically linked to blockchain technology, which through the use of a public and distributed database, prevents information from being modified by an individual, as each transaction has to be ratified by the entire network.

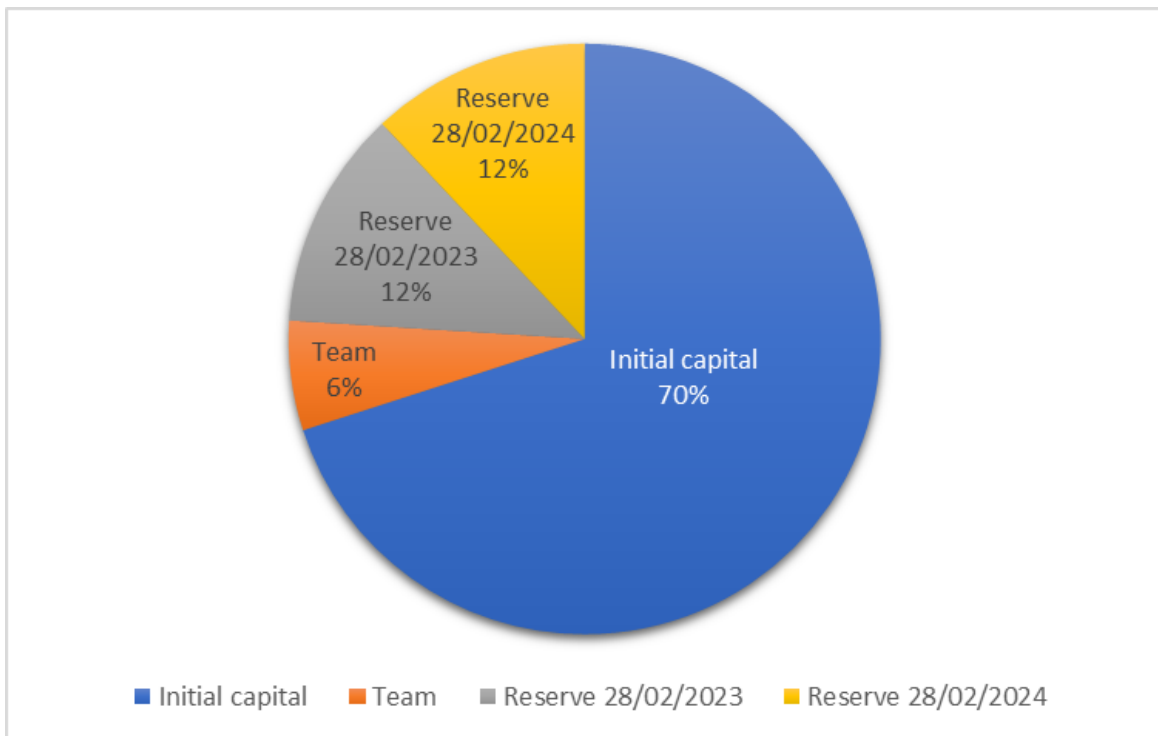

All transactions are validated by an asymmetric cryptographic system that prevents modification from a third party.

Digital asset information

| | |
|--------------------------|---|
| Token name | CryptoPeseta |
| Stock exchange symbol | CPTS |
| Total supply | 100.000.000.000 |
| Cryptoasset distribution | There is no ICO. It will be distributed directly on exchanges |
| Address of contract | 0x644fB6e86c3B248AE1b0a3775B3C3f473E5e147B |

Distribution of digital assets

Four initial wallets will be created. One for the development team with an amount of 6,000,000,000,000 CPTS, one with 70,000,000,000,000 CPTS to be distributed among the different exchanges for distribution, and two reserve wallets with 12,000,000,000,000 CPTS each to be put into circulation in later years. The distribution of this digital asset is therefore as follows:

Addresses of wallets

Below are the addresses created by the CryptoPeseta project where you can verify the distribution of all CryptoPeseta at the start of the project.

| | |
|-------------------|--|
| Initial capital | 0xc5200D0702Ad98A8A139a123F6078c60189a0735 |
| Capital reserve 1 | 0x479f011Cc31C914717f3C32F596F7FB3Ff63b7E7 |
| Capital reserve 2 | 0x0c369eA66B375B583f1b4d7208473C4924135D3f |

Blocking capital

The initial distribution will be a total of 76,000,000,000,000 CPTS with 24,000,000,000,000 CPTS blocked in two wallets.

The first wallet will be released on 2/28/2022, distributing a total of 1,000,000,000,000 CPTS, every 28th day of subsequent months, this same operation will be repeated until a total amount of 12,000,000,000,000 CPTS is reached.

The second wallet will be released on 2/28/2024, distributing a total of 500,000,000,000,000 CPTS, every 28th day of subsequent months, this same operation will be repeated until a total of 12,000,000,000,000 CPTS is reached.

Therefore, the liberalisation of all capital will end on 2/28/2026 leaving a total circulating CryptoPeseta of 100,000,000,000,000 CPTS.

Forthcoming developments

Binance Smart Chain

The first development of the project will be to create the contract on Ethereum Smart Chain so that the CryptoPeseta will coexist simultaneously on both blockchains.

NFT marketplace

Before the end of the year, we intend to have an NFT marketplace of card gifs as a reward for CryptoPeseta holders.

Token holders will be able to purchase unique and exclusive designs of motifs related to our brand as well as other forms of collectibles related to the peseta and its history.

Metaverse

Within two years, CryptoPeseta will be integrated with the metaverse for purchases of objects and services from users of the metaverse.

A virtual universe or metaverse will be created in which CryptoPeseta tokens will be used to support all the commercial activity that takes place there. In this metaverse we will also be able to find unique objects or NFT for use and collection.

Legal information

Objective

The purpose of this document is to present the CryptoPeseta project, a cryptocurrency that works on the Binance Smart Chain Blockchain.

The CryptoPeseta project, as described in this technical document, is under development and is constantly being updated, including, among other things, technical features, behavioural model, etc. The CryptoPeseta team reserves the right to make any necessary modifications as a result of such updates.

Regulatory status in all jurisdictions is not guaranteed

CryptoPeseta intends to operate in full compliance with applicable laws and regulations and to obtain the necessary licences and approvals in key markets. This means that the development and implementation of all features of the CryptoPeseta project described in this whitepaper are not guaranteed. Licences and/or regulatory approvals may be required in certain jurisdictions in which the relevant activities may take place. No guarantee or warranty is given that such licences or approvals will be obtained within any particular time frame, or at all. This implies that the CryptoPeseta token and other features of the proposed Binance Smart Chain network may not be available in certain markets, or at all. This could require the restructuring of that ecosystem and/or its unavailability in all or certain respects.

In addition, it is envisaged that the development of the platform will be carried out in stages. During certain stages of development, the platform may rely on relationships with certain authorised third party entities. If these entities are no longer duly authorised in the respective jurisdiction, this will affect the ability of the CryptoPeseta cryptocurrency to relate to that party, including its services and functions.

No investment counselling

This whitepaper does not constitute any investment advice or recommendation by CryptoPeseta on CryptoPeseta acquisition decisions, nor should it be relied upon in connection with any other contract or purchase decision.

Translations

This whitepaper and related materials are published in Spanish. Any translation is for reference purposes only. The accuracy and completeness of any translation cannot be assured. If there is any inconsistency between a translation and the English version of this whitepaper, the Spanish version shall prevail.

Risk Disclosures

The purchase of CryptoPeseta tokens involves considerable risk and may lead to the loss of a substantial or total amount of the money involved. Before purchasing CryptoPeseta tokens, you should carefully assess and consider the risks, including those contained in any other documentation.

A buyer should not purchase CryptoPeseta tokens for speculative or investment purposes. Purchasers should only buy CryptoPeseta tokens if they fully understand the nature of CryptoPeseta tokens and accept the corresponding risks.

Cryptographic tokens may be subject to expropriation and/or theft; hackers or other malicious groups or organisations may attempt to interfere with the Binance Smart Chain system/network in various ways, including malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing which may result in the loss of your cryptographic tokens or the loss of your ability to access or control your cryptographic tokens. In such an event, there may be no remedy and holders of cryptographic tokens may not be guaranteed any remedy, refund or compensation.

The regulatory status of cryptographic tokens and digital assets is currently unresolved, varies across jurisdictions and is subject to significant uncertainty. It is possible that certain laws, regulations, policies or rules relating to cryptographic tokens, digital assets, blockchain technology or blockchain applications may apply in the future that directly or indirectly affect or restrict the right of holders of cryptographic tokens to acquire, own, sell, convert, trade or use cryptographic tokens.

Uncertainty of tax law relating to crypto tokens and digital assets may expose holders of crypto tokens to tax consequences related to the use or trading of crypto tokens, depending on the jurisdiction.

Digital assets and related products and services involve significant risks. Prospective purchasers should assess the nature of the relevant risks and their own appetite for them independently and consult their advisers before making any decisions.

CryptoPeseta Team

- ❖ Antonio J. Viñas - Software Engineer
- ❖ Fco. Antonio Tirado - Cross-platform Developer
- ❖ Fco. Javier Rodríguez - Systems Administrator
- ❖ Jorge A. Barón - Full Stack Developer
- ❖ Manuel A. Salas - Web Developer
- ❖ Alejandro López - Graduate in Accounting and Finance
- ❖ Miguel Villa - Graduate in Law
- ❖ Jesús Ceacero - Cross-platform Developer
- ❖ Juan Quintana - Financial Advisor
